# WHICH DECKING IS RIGHT FOR YOU?

## EOVATIONS™ TECHNOLOGY

- Voyage
- Vault
- Frontier

Since its creation in 2007, Eovations™ technology has perfected the substrate found in several Deckorators® decking products. The unique process starts with a mixture of polypropylene and calcium carbonate that's pultruded, which creates cavitation or tiny air pockets. This keeps the boards lightweight, but with a fiber-like structure similar to wood, providing unmatched strength.

Provides the industry's best strength-to-weight ratio

Nearly 35% lighter than traditional composites and similar in weight to PVC

Virtually no thermal expansion or contraction

Warranted for installation in or in contact with the ground or water

## TRADITIONAL COMPOSITE

- Heritage
- Vista
- Classic

Deckorators® wood plastic composite decking is created by a unique extrusion process resulting in a stronger and more reliable deck board. The boards are capped on three sides with some of the most durable polymer technology available.

Capped on three sides through the groove
